

K3SOLUTIONSLLC

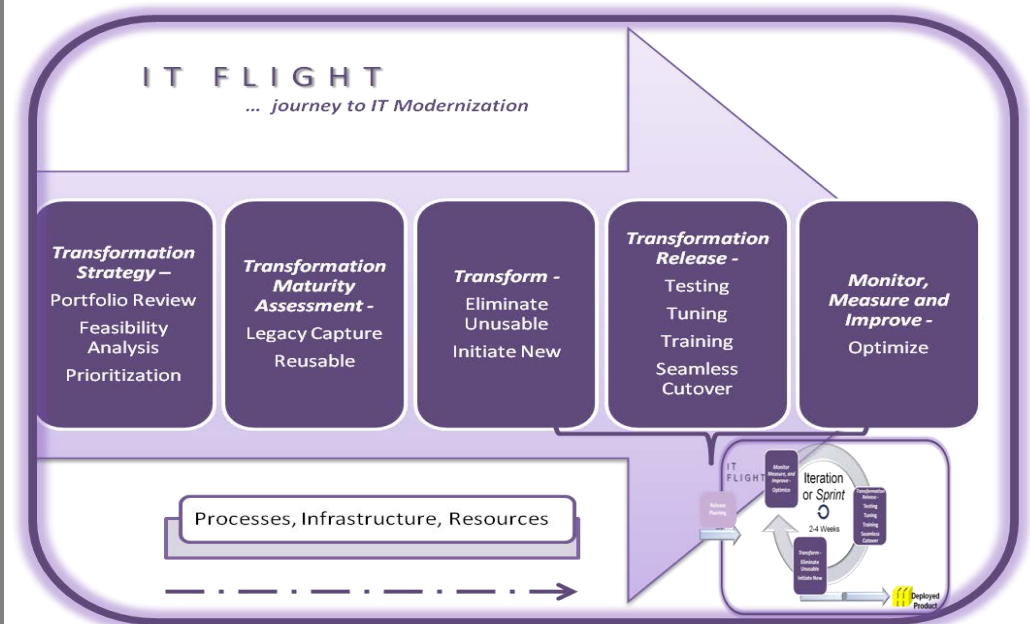

IT Modernization

SEI Partner

Overview

K3 Solutions has defined a proactive, priorities-based, repeatable methodology for transforming enterprises from costly legacy architectures with limited accessibility into highly efficient applications running on lower-cost platforms. Streamlining, partnering, and strengthening are core tenants of our approach. Our agile approach introduces high priority changes first and establishes an effective roadmap forward which serves as a plan to mitigate risks to modernization making it an integral part of an organization's IT program.

Features

- **Partnership**—Business and IT Leadership involvement throughout the process
- **Enterprise Architecture**— Application alignment with business processes
- **Agile** — Small, frequent, increment release cycles focusing on key capabilities first
- **Legacy Reuse** — Leverage key business functionality where appropriate
- **Collaboration** — requirement and technical reviews are performed with stakeholders
- **Streamlining**— Operational process improvement; IT resource enhancement

Benefits to our Customers

Our IT Modernization Methodology is comprised based on the need to realize the following benefits for our customers:

- Agile, faster, and responsive delivery of IT capabilities
- Better alignment of IT strategy and business strategy
- Lower application maintenance costs
- Eliminating silos/stovepipes and redundancy across business processes & systems
- Flexible integrated IT systems
- Improved mission effectiveness, user satisfaction, cyber security and interoperability
- Improved communications with agency/business stakeholders
